

**Synopsis:** ICD-9 diagnosis code 998.2, as the defining diagnostic criteria for PSI 15 has been determined to map to 29 different ICD-10 diagnosis codes. 28 of those codes correspondingly map back to the original ICD-9 diagnosis code of 998.2. One ICD-10 diagnosis code, T888XXA, maps back to a different ICD-9 diagnosis code of 999.9. This code is not currently considered to be part of the selection criteria for PSI 15. However, if regulatory agencies decide to include T888XXA in its final ICD-10 based selection criteria, then cases including ICD-9 diagnosis code 999.9 could theoretically qualify for inclusion and measurement after October 1, 2014. NYP applied ICD-9 diagnosis code 998.2 to 259 inpatient cases across all campuses (excluding LMH) for the service discharge period 1/1/2013 through 12/31/2013. An additional 49 inpatient cases across the same time period had ICD-9 diagnosis code 999.9 applied. This equates to a 19% potential increase in the population that qualifies for measurement of this indicator.
