

Admission Screen New Fields: ICD10 Diagnosis and Procedure Fields

In preparation for ICD-10, there have been some changes to various admission and maintenance screens in Eagle. Effective for **dates of service of October 1** and after, Eagle will support staff's ability to capture ICD-10 diagnosis codes and ICD-10 procedure codes (as applicable). Recording of these codes will facilitate financial clearance activities for ambulatory surgeries and inpatient admissions.

Pre-Admissions Maintenance:

- The **Diagnosis** section has a field for ICD-10 diagnosis codes
- The **Procedure** section also has a field for ICD-10 procedure codes
- Surgical cases booked through the OR Manager scheduling system will automatically populate both ICD-9 and ICD-10 codes if they are selected by the scheduling provider
- Cases not scheduled through OR Manager may be entered directly into the appropriate field

Inpatient Admission

- The **Diagnosis** section has a field for ICD-10 diagnosis codes.
- Should it be available, users may enter the ICD-10 diagnosis code based on information provided by the admitting physician.

Admission Screen New Fields: ICD10 Diagnosis and Procedure Fields

Admission Maintenance

- The **Diagnosis** section has a field for ICD-10 diagnosis codes.
- Users may enter the applicable ICD-10 diagnosis code as it becomes available from the admitting physician.
